

# Python Backend Developer

*Become our new Python developer and join us in shaping the time registration market of tomorrow!*

## WHO ARE WE?

Intempus is a modern tech company with a flat hierarchy and innovation in our hearts. We believe in basing company decisions on merit, and therefore encourage all team members to contribute with new ideas and inputs to create a better experience for our users.

In order to build scalable solutions for our customers, we need the strongest team possible. Joining Intempus you will become part of a fun, friendly and social team that has the freedom to design our own processes.

- Weekly hack afternoon
- Flexible work hours, where you can work when it fits you from home or at the office
- Central location in Copenhagen (150 meter from Vesterport station)
- Social events with Friday bars, paintball, go-karts, and game nights
- Pick-your-own dev machine
- When you grow, we grow! Therefore we encourage all team members to engage in peer-to-peer learning, external courses and conferences

## WHO ARE YOU?

We are looking for a new member who wants to become part of our ambitious team of developers and join our journey of growth.

## MINIMUM REQUIREMENTS

We are looking for a new member who wants to become part of our ambitious team of developers and join our journey of growth.

- Min. 2 years of experience with Python and/or Django in a professional environment
- Live or want to live in Denmark

## PREFERABLE, YOU...

- Have experience with Postgresql and Docker would be an advantage
- Want to be part of a social team
- Apply critical thinking in your work
- Like to contribute with new ideas and inputs
- Possess solid communication skills (written and verbal)
- Have experience with scaling a system from few to many users

## APPLICATION

Please send your application to HR Manager, Marina Overbye, at [mo@intempus.dk](mailto:mo@intempus.dk)

## START

TBD

## WORKPLACE

Staunings Plads 3, 1607 Copenhagen V

## CONTACT

For further information regarding the position, please contact Marina Overbye at +45 60 80 59 75 or [mo@intempus.dk](mailto:mo@intempus.dk)

Your role is important in order for us to maintain a stable and reliable system while scaling. Your responsibilities will vary and will amongst others include:

- Develop task based customer requirements for optimizing their workflows
- Build strong integrations between Intempus and external systems (salary, ERP, etc.) to make our customers lives easier
- Implement algorithms for planning and calculating overtime

We are looking for a new member who wants to become part of our ambitious team of developers and join our journey of growth.
